PROFESSIONAL SUMMARY

Motivated Computer Science graduate with strong fundamentals in programming, web development, and cybersecurity basics. Hands-on experience in Python, data analysis, and secure system design. Passionate about information security, vulnerability analysis, and protecting systems from cyber threats. Eager to contribute to a cybersecurity team by learning and applying security monitoring, incident response, and best practices in real-world environments.

EDUCATION

Vaagdevi College of Engineering, Warangal B.Tech Computer Science and Engineering.	2022- 2025 8.2/10 CGPA
Government Polytechnic, Bellampally Diploma in Mining Engineering.	2019 - 2022 9.2/10 CGPA
Shloka High School, Warangal SSC.	2018 - 2019 9.5/10 CGPA

SKILLS

Languages	Python
Libraries	Numpy, Pandas, Matplotlib, Scikit-learn
Databases	SQL(MySQL)
Web Technologies	HTML, CSS, JavaScript
Core Concepts	Object-Oriented Programming (OOPS), Exception Handling, File Handling
Cybersecurity Concepts	Cybersecurity fundamentals ,Phishing attacks and prevention,DDoS attacks, Man-in-the-Middle attacks,SQL Injection, Firewall and network security concepts
Developer Tools	VS Code, Jupyter Notebook
Soft Skills	Communication, Teamwork, Leadership

PROJECTS

Secure File Transfer Using IPFS with Blockchain

- Designed and implemented a decentralized file-sharing system by integrating IPFS for distributed storage and blockchain smart contracts for secure access control.
- Ensured data integrity and privacy by leveraging blockchain's immutability, while eliminating risks associated with centralized storage solutions.
- Demonstrated the potential of decentralized technologies through a user-friendly interface that facilitates secure and transparent file transfer.
- Technologies used: Python, HTML, CSS, JavaScript, Blockchain, IPFS, SQL

Optical Character Recognition (OCR)

- Developed a Python-based application utilizing the EasyOCR library to accurately extract and recognize text from images with high efficiency.Automated the text processing workflow, reducing manual effort and improving data accessibility for further use in digital systems.
- Enhanced usability by testing across multiple image formats and scenarios, demonstrating practical applications of computer vision in real-world tasks.
- Technologies used: Python, EasyOCR

CERTIFICATIONS

- Python Full Stack Virtual Internship by EduSkills, AICTE.
- Python Essentials by OpenEDG Python Institute(CISCO).
